Company Snapshot & Customer Need

- **ONNIT** is a health & performance brand focused on mind and body wellness
- Best known for **Alpha Brain**, a cognitive-support supplement line
- Brand image: high-performance, modern, wellness lifestyle
- **Customer need:** students want energy and focus for studying and work
- Regular coffee can cause jitters, crashes, and inconsistent focus
- Students need a fast, portable option that fits busy schedules

New Product Concept & Benefits

- Alpha Brain Smart Coffee will be packaged as instant coffee sticks with added “focus blend.”
- Mixes quickly with hot or cold water (anytime, anywhere)
- Designed for steady energy and mental clarity (not just caffeine)
- Portable: easy to carry in a backpack for campus/libraries
- Helps reduce “regular coffee problems.” like jitters and energy crashes
- Positioning: coffee upgraded for productivity and flow

Substitutes

Substitutes are products students commonly use to stay awake and energized while studying.

While effective short-term, frequent or long-term use of these options may lead to negative health effects. Some substitutes can create dependence or make it harder to sleep.

Even “safer” options may not give the same boost and can still affect your body over time.

Substitutes

- **Regular coffee** – can cause anxiety or sleep issues if overused
- **Energy drinks** – high caffeine and sugar may lead to crashes and heart stress
- **Caffeine pills** – risk of overuse and dependence
- **Green tea / matcha** – safer option but weaker effects

Competitors

Direct Competitors

- MUD\WTR – Functional coffee alternative with focus and adaptogen ingredients
- Four Sigmatic – Mushroom coffee blends for energy and mental clarity
- Bulletproof Coffee – Premium coffee brand focused on performance and productivity

Indirect Competitors

- Energy drinks (Celsius, Red Bull) – Quick energy, but often cause crashes and jitters
- Regular instant coffee brands – Affordable and convenient, but no focus benefits
- Caffeine pills – Fast energy, but higher risk of side effects

-Why Alpha Brain Smart Coffee stands out:

Combines real coffee with focus support in a portable instant format—giving steady energy without the crash.

Strengths

- Very convenient format (instant coffee sticks)
- Easy to use, portable, and quick to make
- Fits busy lifestyles (students and young adults)
- Gives energy and focus support at the same time
- People already drink coffee, so it's an easy upgrade to their routine

Opportunity

- Gen Z likes products that help with productivity and performance
- Strong potential for social media marketing (study routines, morning habits, productivity trends)
- Can promote it through easy-to-use / quick prep content
- Can expand later with new flavors or variety packs

SWOT ANALYSIS

Weaknesses

- Some customers may not trust nootropics or believe they work
- Functional ingredients could affect the taste
- Higher price than regular instant coffee because of added ingredients
- Marketing must be careful with claims (can't advertise it as medical treatment)

Threats

- Strong competition (energy drinks, regular coffee brands, similar products)
- Some people avoid caffeine due to anxiety or sleep issues
- Risk of being seen as “overhyped” if marketing is too intense, so messaging should stay realistic

Target Market Profile

- Gen Z adults (18–28) who already drink coffee and want sharper focus and steady, sustained energy throughout the day.
- Busy students and young professionals juggling classes, studying, work, and personal responsibilities, making them drawn to time-saving products.
- Highly motivated by mood-boosting benefits and anything that helps them stay alert and productive without the jittery side effects of energy drinks.
- The instant, no-brew format fits seamlessly into fast-paced routines—perfect for grabbing before a lecture, a study session, or a work shift. - brayam

Why does this fit?

- They already drink coffee every day, so switching to a smarter, instant version is an easy upgrade.
- Their schedules are packed, so anything quick, convenient, and ready to go fits their lifestyle perfectly.
- They're always looking for ways to boost focus, stay in a good mood, and get stuff done without feeling weird.
- They want clean, steady energy. Not the crash or weird side effects that come with a lot of energy drinks. - brayam

Positioning Statement

For gen Z students and young professionals (ages 18 -28) who already drink coffee

Who wants steady energy, sharper focus for studying, work, busy days

Alpha Brain Smart Coffee is an instant functional coffee stick with an added focus blend

- That delivers smoother energy and mental clarity without the heavy jitters or crash
- Unlike regular instant coffee or energy drinks that can lead to anxious energy, crashes, and inconsistent focus
- Our product helps you stay productive and locked-in with a fast, portable coffee upgrade

Alpha Brain Smart Coffee is a portable instant coffee stick designed for Gen Z students who want steady energy and clearer focus without the crash.

Please reffl coffee.

Unique Selling Point

"Smart coffee in one quick stick energy that lasts, without the crash."

- What makes it different (USP Proof Points):
 - ☐ Instant and portable mix with hot OR cold water anywhere
 - ☐ Energy and focus together (not just caffeine)
 - ☐ Less jitters and fewer crashes than regular coffee and energy drinks
 - ☐ Built for busy schedules (campus, studying, work shifts)
 - ☐ Coffee upgraded for productivity and flow
